

*Help improve wellbeing and prevent suicide among
Australian doctors and doctors-in-training*

Participate in a confidential online survey

Researchers at UNSW and the Black Dog Institute invite you to take part in an **anonymous**, confidential **online survey** asking Australian **doctors and doctors-in-training** about your:

- wellbeing and working life
- your mental health service needs and priorities

The survey will take **20 minutes**, and if you complete the survey, you can opt in to enter a prize draw to win a \$200 e-gift card.

Your input will inform interventions and recommendations to improve the mental health and suicide prevention support provided to doctors in Australia.
